

DECIDE ACTION

QUALITY ACTION

QUALITY4ACTION is designed to error-proof your operations, reduce manual record keeping, control costs, improve consistency and help you deliver better products faster.

QUALITY4ACTION is a cost-effective approach to automatic verification and accurate data capture provides operators with constant access to current formulations, verifies components accurately, assembles an electronic “paper trail”, and tracks inventory using a simple and reliable automatic data collection method.

QUALITY4ACTION provides real-time feedback, captures lot numbers for traceability assistance and maintains an error log which measures operator performances for team comparisons and accountability.

DECIDE4ACTION

QUALITY4ACTION guarantees 100% verification of your product to ensure flawless quality.

BATCH VERIFICATION

BATCH VERIFICATION offers a real time solution to “error-proof” your batching operations, deliver better products faster, reduce manual record keeping, control costs, and improve batch consistency.

LABEL VERIFICATION

LABEL VERIFICATION provides high-speed scanning which verifies barcode accuracy and readability, monitors count and speed, automatically stops when errors are detected as well as maintains an electronic record of events.

PACKAGE VERIFICATION

PACKAGE VERIFICATION verifies the proper selection of packaging components to capture the associated lot numbers of the components used during production runs.
