

DECIDE ACTION

ERP 4 ACTION

ERP4ACTION is a modular enterprise resource planning (ERP) software application that is customizable and configurable. Manufacturers, machine shops and organizations leverage our ERP to better control all aspects of their business: from purchasing raw materials to bidding job costing to production scheduling to production runs to inventory management to final delivery.

ERP4ACTION gives you more control over your operations, production, quality and costs:

Simplify the steps and generation of documents like work orders, cost sheets, invoices, etc.

Manage raw materials and finished goods inventories in real-time.

Provide the location of each of the products on the shop floor or at a third-party location.

Determine precisely the manufacturing time for each project, product or operation

Automate tasks and information sharing for alerts, reporting, administration, etc.

... and much more.

DECIDE4ACTION

ERP4ACTION directly interfaces with industry-popular accounting software programs. Streamlines data capture and recordkeeping. Prevents double entry of client files and invoices, supplier files and invoices. Transfers worked hours for payroll processing.

ERP4ACTION provides direct integration capabilities with several CAD systems. Customized manufacturers can optimize the complete business operation, from design and engineering, through production to client delivery.

ERP4ACTION SUITE ALSO INCLUDES:

SERVICE4ACTION
