

## Automatically Capture Data with Real Accuracy

### CAPTURE DATA WITH EASE

Quality is designed to error-proof your operations, reduce manual record keeping, control costs, improve consistency, and help you deliver better products faster.

Quality4Action is a cost-effective approach to automatic verification and accurate data capture provides operators with constant access to current formulations, verifies components accurately, assembles an electronic "paper trail", and tracks inventory using a simple and reliable automatic data collection method.

Providing real-time feedback, Quality4Action captures lot numbers for traceability assistance, and maintains an error log that measures operator performances for team comparisons and accountability.

### INNOVATIVE SOFTWARE SOLUTIONS

- ▲ Batch verification
- ▲ Labeling
- ▲ Packaging

# Quality Action

## Batch Action

- Batch verification offers a real-time solution to “error-proof” your batching operations, deliver better products faster, reduce manual record keeping, control costs, and improve

## Label Action

- Label verification provides high-speed scanning which verifies bar-code accuracy and readability, monitors count and speed, automatically stops when errors are detected as well as maintains an electronic record of events.

## Package Action

- Package verification verifies the proper selection of packaging components to capture the associated lot numbers of the components used during production runs.

### WHAT IS DECIDE4ACTION ?

On the surface, DECIDE4ACTION is a suite of software solutions that helps organizations improve performance and maximize productivity. But at its core, it is an integrated decision-making platform...much, much more than just software.

DECIDE4ACTION succeeds where most Business Process Management Software fails. It goes beyond an impressive feature list and a modern user interface and actually gets to the root of the problem: simplifying and automating decision making to streamline business processes and to drive actions.

### Three Decades of Proven Results

Because our team has first-hand experience working in engineering and manufacturing environments, we understand exactly what our clients need. And as a result, our software and hardware products have yielded consistent results in a wide range of industries including food & beverage, textiles, and other related manufacturing environments for more than 30 years.
